LKS2 - Homework Web

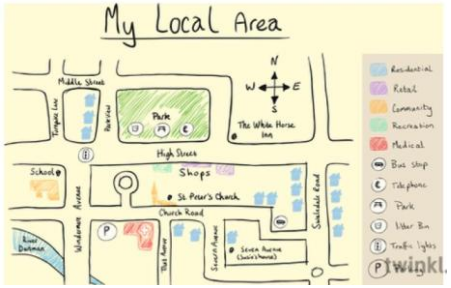

Autumn 2 – What can I see from my window?

Please choose 1 of the following projects to complete to help further your knowledge and understanding of this half term's Geography unit all about our local area. **Alternatively, if you would like to complete a different related project, you can surprise your teacher with that instead.**

Option 1: Can you create a map of the area where you live?

Explore the area around your home with an adult and create a map showing important local places.

What you might include:
- Your home and at least five local places, such as a park, shop, school, library or place of worship.
- Roads, paths and other important features.
- A map key using symbols.

Option 2: What can I see from my window?

Use a shoebox to create a miniature 3D version of the view from your window.

Your model could include:
- The background: What can you see in the distance? Perhaps houses, trees, hills or buildings.
- The middle ground: What is in the middle of your view, such as a road, garden, fence or playground?
- The foreground: What can you see closest to your window?

All homework should be completed to the best of your ability and handed in prior to the last phase assembly of the half-term.

The Gates Primary School Westhoughton

Growth Teamwork Success Achievement Enjoyment

Option 3: How has Westhoughton changed over time?

Investigate a local street, building or landmark to discover what it was like in the past and compare it with how it looks today.

What you might include:
- Find an old photograph of a local place, perhaps by asking a family member or searching online with an adult.
- Take or draw a picture of what the place looks like today.
- Identify some similarities or differences.

Make it creative: Create a Then and Now poster, a split-page drawing or a miniature model of the building.
