

UKS2- Homework Web

Spring 2

Please choose 1 of the following projects to complete to help further your knowledge and understanding around one of this half term's areas of learning.

Alternatively, if you would like to complete a different project, related to another aspect of your learning, you can surprise your teacher with that instead.

Option 1:

Create a guide to the water cycle, or even a mini water cycle in a bag!

Present in any way you wish, but be sure to include key vocabulary such as precipitation, condensation, evaporation, collection, transpiration. runoff.

Option 2:

Write and perform a persuasive speech on an area of interest

In June, some of the children from Y5/6 will be chosen to take part in the 'Youth Speaks' debating competition. A competition we won last time we entered. Why not take this time to have a practise and audition?

Your speech could be of any area that you are passionate about, but one in which you are arguing for a good cause and support of others would be ideal. As an idea, our previous entries focussed on deforestation.

What will you choose?

All homework should be completed to the best of your ability and handed in prior to the last phase assembly of the half-term.

Achievement

Enjoyment

Option 3:

Follow a recipe – adult supervision required

Linking to part of our Maths learning around measures and ratio, and our DT learning about making bread, can you follow a recipe to bake something of your choice?

Make sure you follow the recipe and accurately measure out all ingredients – you may need to use your ratio learning if you are making more, or less than the amount the recipe indicates.

Take photos as you go and make sure you evaluate your final outcome.
