

UKS2- Homework Web

Autumn 2:

Please choose 1 of the following projects to complete to help further your knowledge and understanding around one of this half term's learning.

Alternatively, if you would like to complete a different project, related to another aspect of your learning, you can surprise your teacher with that instead.

Option 1:

Create a working model of a volcano

A volcano is an opening in the Earth's crust that allows magma, hot ash and gases to escape. Make a 'working model' of a volcano and label or explain the key parts.

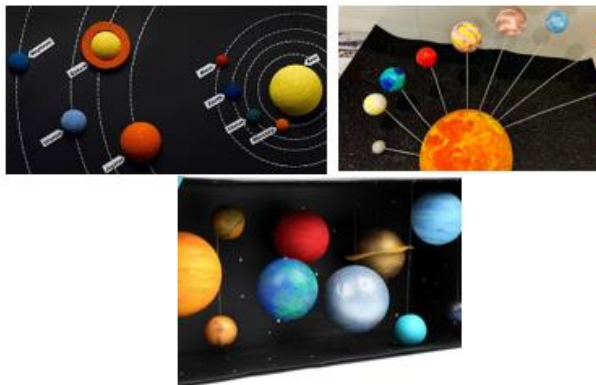

Option 2:

Create a model of the Solar System

The Solar System includes the Sun, the Earth (where you are now!) and all of the other planets, asteroids and comets that go around and around it.

Create a model of the solar system using any materials at home. What interesting facts can you find out to add to the model?

Here is one interesting fact: The Sun is a star – a massive ball of hot gas that gives off light and heat.

All homework should be completed to the best of your ability and handed in prior to the last phase assembly of the half-term.

Option 3:

Record a news broadcast

Record a news broadcast using a movie maker app (iMovie) to report on a historic volcanic disaster e.g. Krakatoa.

You could even base your news broadcast on a significant event linked to Space e.g. a moon landing!

Research the news events in detail before creating your video.

Here is an example:
